PJApp application privacy policy

1. General information

This Privacy Policy sets out the rules for the processing of personal data of users of the PJApp mobile application (hereinafter: "Application").

The administrator of the personal data of Application users is the Polish-Japanese Academy of Computer Technology, with its registered office at ul. Koszykowa 86, 02-008 Warsaw, NIP: 5262160983 (hereinafter: "PJATK" or "Administrator").

Contact the Administrator in matters related to data processing: samorzad@pja.edu.pl, tel. +48 22 58 44 500.

The Administrator has appointed a Data Protection Officer (DPO) who can be contacted by sending a message to: iod@pjwstk.edu.pl

The application is intended exclusively for PJATK students who are over 18 years of age.

2. Description of the Application and how to use it

PJApp is a mobile application created by the PJATK Student Council for university students to provide up-to-date information on, among other things, student events and trips organised by the Student Council, in particular recurring trips such as WINTEGRAL or INTEGRAL.

As part of the trips module, the application allows users to create groups, participate in competitions between groups, perform tasks (e.g. using photos or location) and voluntarily share their location with other participants of a given trip.

You log in to the Application by entering your PJATK student e-mail address, to which a one-time login code is sent.

The application does not have a separate website and is only available as a mobile application.

3. Scope of data processing

In connection with the use of the Application, the Administrator may process the following user data:

- first and last name,
- student email address in the PJATK domain,
- profile photo (optional, if added by the user),
- location data (optional, only for travel functions - sharing your location with other participants or completing a check-in task),
- information about activity in the Application to the extent necessary to perform its functions (e.g. membership in groups, participation in tasks and competitions).

The Application does not automatically collect additional data identifying the user (e.g. IP address, advertising identifiers) beyond what is technically necessary for its operation on the server side.

4. Purposes and legal basis for processing

The personal data of Application users is processed for the following purposes:

- to provide access to the Application and its basic functions (logging in, displaying information, participating in events and trips),
- operating the trip module, including creating groups, running competitions and completing tasks during trips,
- voluntary sharing of location with other trip participants, if the user chooses to use this feature,
- communicating with users (e.g. through push notifications related to events or trips).

The legal basis for data processing is the user's voluntary consent (Article 6(1)(a) of the GDPR), granted in particular for:

- use of the Application and creation of an account,
- receiving push notifications,
- use of the camera/photos and location as part of the travel functionality.

Providing data is voluntary, but necessary to use the Application. Failure to provide data or withdrawal of consent may prevent the use of some or all of the Application's functionality.

5. User rights

Users have rights under the GDPR, in particular:

- the right to access their data,
- the right to rectify it,
- the right to erase data ("right to be forgotten"),
- the right to restrict processing,
- the right to object to processing,
- the right to data portability,
- the right to withdraw consent at any time, without affecting the lawfulness of the processing that was carried out before its withdrawal.

Some of these rights (access, editing, account deletion) can be exercised directly by the user in the user panel in the Application.

In matters related to the exercise of rights, the user may also contact the Administrator or the Data Protection Officer (contact details in point 1).

Furthermore, the data subject has the right to lodge a complaint with the supervisory authority – the President of the Personal Data Protection Office (President of the PDPO) – if they believe that the processing of personal data violates the provisions of the GDPR. The President of the PDPO can be contacted as follows:

- by post: ul. Stawki 2, 00-193 Warsaw;

- via the electronic mailbox available at https://www.uodo.gov.pl/pl/p/kontakt;
- by telephone: (22) 531 03 00. In order to exercise your rights, please contact the Data Protection Officer (iod@pjwstk.edu.pl).

6. Data storage and retention period

The personal data of Application users is stored for the period of the user's use of the Application.

After you stop using the Application (e.g. when you delete your account), your data is deleted or anonymised within the time limits specified in the Administrator's internal procedures, unless further storage is required by law.

If the user does not use the Application for a period of 2 years, the Administrator deletes their data from the system, unless there is another legal basis for further processing.

Data related to a specific trip may be stored for the period necessary to settle and document the trip, and then archived or anonymised in accordance with the law and PJATK policies.

7. Place and method of data processing

Data processed in connection with the use of the Application is stored on servers located in Poland, in infrastructure that meets the security requirements specified by law and PJATK's internal regulations.

The administrator shall implement appropriate technical and organisational measures to protect data against accidental or unlawful destruction, loss, alteration, unauthorised disclosure or access.

8. Data sharing and processors

The data of Application users is not sold or shared with other entities for marketing purposes.

Data may only be entrusted to trusted entities providing services to PJATK (e.g. hosting, server and IT system providers) to the extent necessary to ensure the operation of the Application – on the basis of relevant data processing agreements.

Authorised members of the PJATK Student Council may also have access to the data to the extent necessary to operate the Application and student events, in accordance with the authorisations granted by the Administrator.

9. Device functions (camera, photos, location, notifications)

The Application may access the following functions of the user's device:

- camera and photos – for the purpose of completing tasks and challenges during trips and for setting a profile photo (if the user decides to use them),

- location – voluntarily, if the user wants to share their location with other trip participants or complete a task that requires checking in at a specific location,
- push notifications – for the purpose of providing information related to events, trips and the functioning of the Application.

Access to the above functions is subject to the user's consent in the device's operating system (e.g. iOS). The user may withdraw this consent at any time in the device or Application settings.

10. Data recipients outside the EU/EEA

The controller does not plan to transfer the personal data of Application users to third countries outside the European Economic Area. If such a need arises, users will be informed in advance and the transfer of data will take place only in accordance with the GDPR (e.g. using standard contractual clauses).

11. Changes to the Privacy Policy

This Privacy Policy may be updated periodically, including in connection with changes to the functionality of the Application, legal regulations or guidelines issued by supervisory authorities.

Users will be notified of significant changes via a message in the Application or other appropriate channel.

The current version of the Privacy Policy will always be available in the Application in the dedicated "Privacy Policy" section.
